Subject: Product Safety

Our letter of November 10, 2006 addressed your possible concerns regarding a recent product recall by GM. In that letter, we set forth Katzkin's remarkable history regarding quality, safety, testing, FMVSS compliance, and OEM approval. We encourage you to read that letter to obtain important details on these topics.

For twenty-four years, Katzkin has taken a proactive approach to safety and testing. The results speak for themselves, as we have literally sold hundreds of thousands of interiors without a single reported safety incident. Despite this extraordinary record, we are not resting on our laurels. We responded to the recent GM announcement immediately by initiating additional testing of our products. Just last week, MGA Research Corporation, an independent testing laboratory approved by the National Highway Traffic Safety Administration, conducted additional safety tests on Katzkin Leather interiors. These tests were performed on the Chevrolet Trailblazer and the Chevrolet Suburban. We selected these specific vehicles for testing because their interiors are shared by multiple GM vehicles, including Silverado, Sierra, Avalanche, Suburban, Envoy, and Tahoe. **The Katzkin Leather interiors passed every test, verifying that our products DO NOT interfere with the proper operation of the vehicle safety systems.** We are pleased to share these test results with you and with your dealers. Please ask your Katzkin sales representative to provide our complete safety and testing package for your review.

All of us at Katzkin are committed to being the best in class. For this reason, we maintain \$51 million in product liability insurance coverage from the highest rated U.S. insurance company; we offer a 3-year 36,000 mile warranty; we operate a manufacturing facility with an ISO 9001:2000 quality management system certified by Underwriters Laboratories; and we are the only supplier of aftermarket interiors to be OEM approved for installation in vehicles with advanced airbag technology. Behind every Katzkin interior there are 447 employees working around the clock to provide the best in quality and safety. Our combined efforts have produced a record that is unsurpassed in the industry.

Sincerely,

Subject: Product Safety

Dear Valued Restyler,

We are aware that you may have concerns regarding a product recall announced last week by General Motors. That recall relates to GM's installation of aftermarket leather interiors in a group of used vehicles sold by GM at auction. Those interiors were supplied to GM by three different manufacturers of aftermarket leather interiors. With this letter, we would like to address any concerns you may have regarding this recall and to assure you of our continuing commitment to quality, safety, and testing.

Over the course of our 24 years in business, Katzkin has taken a proactive stance on safety matters, especially relating to airbags and occupant classification systems. With the introduction of side impact airbags in 1996, we initiated independent testing of our products. Since that time, we have continually performed both internal and external testing to ensure that our interiors meet and exceed the highest standards. Over the years, we have sold hundreds of thousands of interiors without a single reported airbag incident. We are proud of that record, and we are determined to sustain it.

Our proactive approach to safety has paid off. In 2005, we were approved by Daimler Chrysler Corporation (DCX) as the only authorized supplier of aftermarket leather interiors for vehicles with Occupant Detection Systems. In 2006, DCX conducted further testing, and determined that our interiors performed to a much broader set of physical standards that apply to all original factory interiors. Meanwhile, we engaged the services of MGA Research Corporation, an independent testing laboratory approved by the National Highway Traffic Safety Administration, to conduct further airbag and OCS testing on our products. Our leather interiors passed all of those tests.

Because we understand your concerns on this topic, we maintain \$51 million in product liability insurance coverage from the highest rated U.S. insurance company; we offer a 3-year 36,000 mile warranty; and we operate a manufacturing facility with an ISO 9001:2000 quality management system that is certified by Underwriters Laboratories. We encourage you to contact your Katzkin sales representative to discuss these matters in greater detail and to obtain our considerable documentation package.

You can depend on Katzkin to provide the best in safety and quality, and you can install our interiors with the confidence that Katzkin is the only aftermarket supplier with OEM approval for vehicles with Advanced Airbag Technology.

Katzkin Leather Inc. Warranty

Your authorized dealer has selected and installed the finest handcrafted top grain leather/vinyl interior available in the aftermarket. Please accept our compliments on your selection for your new car equipped with Katzkin's Leather package. Our designers and craftsmen have methodically tailored your vehicle's interior to conform to the manufacturer's requirements. We have carefully selected the finest automotive grade leather hides designed to meet or exceed the manufacturer's original specifications. We are confident you will appreciate the luxury and comfort offered by our leather interior upgrade developed with your discriminating taste in mind for years to come.

Limited Warranty

This warranty is valid only on **KATZKIN LEATHER INC.** products purchased and used in the United States of America. This warranty is made solely by **KATZKIN LEATHER INC.** and is explicitly limited to the original consumer.

Obligations

KATZKIN LEATHER INC. warrants its leather/vinyl interiors to be free from defects in workmanship and material when used under regular conditions for a period of three years or 36,000 miles, whichever occurs first. This warranty will not apply as a result of improper installation, alteration, unauthorized repair, abuse, or accident. The purchaser will have no entitlement to recuperate from **KATZKIN LEATHER INC.** or any **KATZKIN LEATHER INC.** dealer, any consequential damages losses or expenses for loss of use, loss of time, loss of profits or income or any other incidental damages arising directly or indirectly from a warranted claim involving this product. This exclusive obligation of this warranty shall be limited to repair any accepted any accepted defective workmanship or material, or, at the discretion of **KATZKIN LEATHER, INC.**, to replace it with comparable product.

Exclusions

This warranty does not apply to claims for abrasions, scuffs, scratches, cuts or abusive and excessive wear. **KATZKIN LEATHER INC.** will not be held responsible for color dye lot variations in connection with any authorized warranty claims. The application of silicone based products and or harsh chemicals can damage or destroy the surface and structure of your leather interior. **KATZKIN LEATHER INC.** recommends the application of mild detergent and water to remove any soil from the surface of your leather. The surface should then be wiped clean with a soft cloth. Use of silicone based products will void this warranty.

KATZKIN LEATHER INC. reverses the right to alter, modify or discontinue products without any obligation in regards to products previously offered.

To obtain warranty repair or replacement: present warranty claim to authorized dealership. Any product to be sent to **KATZKIN LEATHER INC.** for repair or replacement must be preauthorized. All warranty claims are at the discretion of **KATZKIN LEATHER INC.**

This warranty gives you specific legal rights to the original customer. Other rights may vary state to state, so above information or exclusions may not apply to you. This written limited warranty is the only warranty authorized and accepted by **KATZKIN LEATHER INC.**

YOUR CUSTOMERS WILL LOVE WEARING KATZKIN

Exclusive Kits for Most OCS-Equipped Dodge, Chrysler and Jeep Vehicles

Mopar and Katzkin Leather Interiors, Inc., have come together to create a unique custom leather seating program for enthusiasts who want to express their individuality. Available exclusively through Chrysler, Dodge and Jeep dealers, Katzkin high-quality leather seats are developed using the latest CAD design technology. They come in over 50 color choices, and carry a 3-year/36,000-mile limited warranty when installed.

CUSTOM LEATHER SEATING PACKAGES FROM KATZKIN

The installation of unauthorized aftermarket seat upholstery can pose a serious risk of immobilization or damage to the Occupant Classification System (OCS) of a vehicle. To remove this risk, Katzkin and Chrysler Engineering worked closely to develop a complete line of OCS compliant seating packages. As a result, Katzkin leather seats can be installed in following vehicle families equipped with OCS: HB (Durango), LX (Magnum, Charger, 300), ND (Dakota), WK (Grand Cherokee), and XK (Commander). (Katzkin

seats can also be installed in any Chrysler Group vehicle not equipped with OCS.)

Chrysler 300 owners may be especially interested in the exclusive Katzkin DUB Edition seating package. For the ultimate in luxury, each seat is outfitted with Katzkin's premier Tuscany leather and SuedeZkin accents with an embroidered DUB Edition logo. Show your best customers how they can turn their 300 into a DUB Edition 300 when they install exclusive Katzkin DUB Edition seats.

The following Katzkin seating packages are all OCS compliant and approved for use by Chrysler Engineering:

LTHROCS1DI	1-row deluxe, installed	LTHROCS2PI	2-row premium, installed
LTHROCS1DU	1-row deluxe, uninstalled	LTHROCS2PU	2-row premium, uninstalled
LTHROCS1PI	1-row premium, installed	LTHROCS3DI	3-row deluxe, installed

* The results presented in this report relate only to the specified test items.

** This report shall not be reproduced except in full, without the written approval of the laboratory.

Objective

This report contains results for FMVSS 208 – Suppression testing requested by Katzkin Leather, Inc. The test samples provided were tested to the requirements stated in FMVSS 208 (49CFR 572, Subpart N S20 dated 01/14/03). A testing matrix was constructed based upon the requirements and needs of Katzkin on one (1) vehicle with one (1) seat (Chevy Suburban). No statement of compliancy will be made in this report.

Purpose

This standard specifies requirements for airbag suppression determination in the right front outboard seating position to eliminate the inflation of the passenger-side airbag when there is no occupant, an unrestrained child, or a child restraint system in the event of a collision.

FMVSS 208 Requirements

The National Highway Traffic Safety Administration (NHTSA) Test Procedure FMVSS 208-TP-12 specified the requirements of this test series.

Compliance shall be determined by the following:

- (a) Place the Child Restraint System (CRS) at the designated seating position.
- (b) Tighten the seat belt load to $130N \pm 3N$ for child seats.
- (c) Tighten the seat belt load to $9N - 18N$ for booster seats.
- (d) Shut all doors and turn the vehicle ignition to the on position.
- (e) Verify that the airbag suppression light is off.

Additional Customer-Specified Requirements

Per request, one (1) photograph was taken (passenger side) of each individual car seat and dummy position.

Equipment

MGA Research Corporation's FMVSS 208 Child Seats were used for this testing. For the complete test series, equipment included 10 child seats, a 50 lbs load cell, and the following dummies: Newborn Infant, CRABI 12 month-old, Hybrid III 3 year-old, Hybrid III 6 year-old, and Hybrid III 5th% Female.

Procedure/Method

Each vehicle was tested in accordance with FMVSS 208-12 test procedure Data Sheets 14-21 & 29. For each test scenario, the vehicle ignition was cycled and the suppression was verified.

Test Results

1 car bed, 3 rear facing, 4 convertible, and 2 booster Child Restraint Systems (CRS) were used to evaluate each seat. All tests requiring the Dummies were completed. All tests were conducted with respect to the standard. The Chevy Suburban appeared to meet the requirements of FMVSS 208 Suppression. All data traceable to the National Institute of Standards and Technology (NIST).

mga research corporation

Date: 11/22/2006
Customer: Katzkin Leather
MGA Job Number: C0717-009.1C

VEHICLE INFORMATION:

Year: 2007
Make: Chevy
Model: Suburban
Body Style: 4 Door SUV Factory Trim
VIN Number: 1GNFK16337J192747

DESCRIPTION OF TEST PROCEDURE:

This test procedure is used to conduct airbag suppression determination testing for FMVSS 208 – Occupant Crash Protection procedures. This procedure is based upon Data Sheet(s) 14 of the NHTSA Test Procedure (TP208-12).

Test Personnel: TF

PASSENGER DESIGNATED SEATING POSITIONS:

Using any part of any control, other than the parts just used for fore-aft positioning, determine the range of angles of the seat cushion reference line and set the seat cushion reference line at the mid-angle.

Maximum Angle:
Minimum Angle:
Mid Angle:

Visually mark for future reference the seat back angle, if adjustable, at the manufacturer's nominal design riding position for a 50th percentile adult male in the manner specified by the manufacturer.

Design Seat Back Angle: 11 deg. @ Headrest
Actual Seat Back Angle: 11 deg. @ Headrest

BUCKET SEATS:

Locate and mark for future reference the longitudinal centerline of the seat cushion. The longitudinal centerline of a bucket seat cushion is determined at the widest part of the seat cushion. Measure perpendicular to the longitudinal centerline of the vehicle.

Width Of Seat Cushion: 557
1/2 Width Of Seat Cushion: 278.5

BENCH SEATS:

Locate and mark for future reference the longitudinal centerline of the passenger seat cushion. The longitudinal centerline is the same distance from the longitudinal centerline of the vehicle as the center of the steering wheel.

Distance from the centerline of vehicle to center of steering wheel: N/A
Distance From The Centerline Of Vehicle To Center Of Passenger Seat: N/A

HEAD RESTRAINTS:

Measure the vertical distance from the top most point of the head restraint to the bottom most point. Locate and mark a horizontal plane through the midpoint of this distance.

Height Of Head Restraint: 200
Mid-Point Height: 100

SEAT BELT ANCHORAGES:

Place any adjustable seat belt anchorages at the vehicle manufacturer's nominal design position for a 50th percentile adult male occupant.

Design Anchorage Position: Notch 2 of 5 from top
Actual Anchorage Position: Notch 2 of 5 from top

TEST REPORT

MGA REPORT NO.: C07I7-009.1D

TEST (S) PERFORMED ON: November 24, 2006

TEST DESCRIPTION: FMVSS 208 - Suppression

ITEM DESCRIPTION: One (1) Chevy Suburban Manual Seat w/Katzkin Trim

PROCEDURE NUMBER: MGATP208 – 12SUP_DS14.doc
Last revision date: 09/15/03

TEST REFERENCE NUMBER (S): SU6632 – SU6649

TEST LABORATORY: MGA Research Corporation
446 Executive Drive
Troy, Michigan 48083

SUBMITTED TO: Kirk Scott
Vice President, OEM Sales
Katzkin Leather, Inc.
6868 Acco Street
Montebello, CA 90640

Helen Kaleto
Project Leader

Test Personnel:
Louis S. Campbell
Tony Frontera

* The results presented in this report relate only to the specified test items.

** This report shall not be reproduced except in full, without the written approval of the laboratory.

Objective

This report contains results for FMVSS 208 – Suppression testing requested by Katzkin Leather, Inc. The test samples provided were tested to the requirements stated in FMVSS 208 (49CFR 572, Subpart N S20 dated 01/14/03). A testing matrix was constructed based upon the requirements and needs of Katzkin on one (1) vehicle with one (1) seat (Chevy Suburban) with Katzkin trim. No statement of compliancy will be made in this report.

Purpose

This standard specifies requirements for airbag suppression determination in the right front outboard seating position to eliminate the inflation of the passenger-side airbag when there is no occupant, an unrestrained child, or a child restraint system in the event of a collision.

FMVSS 208 Requirements

The National Highway Traffic Safety Administration (NHTSA) Test Procedure FMVSS 208-TP-12 specified the requirements of this test series.

Compliance shall be determined by the following:

- (a) Place the Child Restraint System (CRS) at the designated seating position.
- (b) Tighten the seat belt load to $130N \pm 3N$ for child seats.
- (c) Tighten the seat belt load to $9N - 18N$ for booster seats.
- (d) Shut all doors and turn the vehicle ignition to the on position.
- (e) Verify that the airbag suppression light is off.

Additional Customer-Specified Requirements

Per request, one (1) photograph was taken (passenger side) of each individual car seat and dummy position.

Equipment

MGA Research Corporation's FMVSS 208 Child Seats were used for this testing. For the complete test series, equipment included 10 child seats, a 50 lbs load cell, and the following dummies: Newborn Infant, CRABI 12 month-old, Hybrid III 3 year-old, Hybrid III 6 year-old, and Hybrid III 5th% Female.

Procedure/Method

Each vehicle was tested in accordance with FMVSS 208-12 test procedure Data Sheets 14-21 & 29. For each test scenario, the vehicle ignition was cycled and the suppression was verified.

Test Results

1 car bed, 3 rear facing, 4 convertible, and 2 booster Child Restraint Systems (CRS) were used to evaluate each seat. All tests requiring the Dummies were completed. All tests were conducted with respect to the standard. The Chevy Suburban with Katzkin trim appeared to meet the requirements of FMVSS 208 Suppression. All data traceable to the National Institute of Standards and Technology (NIST).

mga research corporation

Date: 11/24/2006
Customer: Katzkin Leather
MGA Job Number: C0717-009.1D

VEHICLE INFORMATION:

Year: 2007
Make: Chevy
Model: Suburban
Body Style: 4 Door SUV Katzkin Trim
VIN Number: 1GNFK16337J192747

DESCRIPTION OF TEST PROCEDURE:

This test procedure is used to conduct airbag suppression determination testing for FMVSS 208 – Occupant Crash Protection procedures. This procedure is based upon Data Sheet(s) 14 of the NHTSA Test Procedure (TP208-12).

Test Personnel: TF

PASSENGER DESIGNATED SEATING POSITIONS:

Using any part of any control, other than the parts just used for fore-aft positioning, determine the range of angles of the seat cushion reference line and set the seat cushion reference line at the mid-angle.

Maximum Angle:
Minimum Angle:
Mid Angle:

Visually mark for future reference the seat back angle, if adjustable, at the manufacturer's nominal design riding position for a 50th percentile adult male in the manner specified by the manufacturer.

Design Seat Back Angle: 11 deg @ Headrest
Actual Seat Back Angle: 11 deg @ Headrest

BUCKET SEATS:

Locate and mark for future reference the longitudinal centerline of the seat cushion. The longitudinal centerline of a bucket seat cushion is determined at the widest part of the seat cushion. Measure perpendicular to the longitudinal centerline of the vehicle.

Width Of Seat Cushion: 557
1/2 Width Of Seat Cushion: 278.5

BENCH SEATS:

Locate and mark for future reference the longitudinal centerline of the passenger seat cushion. The longitudinal centerline is the same distance from the longitudinal centerline of the vehicle as the center of the steering wheel.

Distance from the centerline of vehicle to center of steering wheel: N/A
Distance From The Centerline Of Vehicle To Center Of Passenger Seat: N/A

HEAD RESTRAINTS:

Measure the vertical distance from the top most point of the head restraint to the bottom most point. Locate and mark a horizontal plane through the midpoint of this distance.

Height Of Head Restraint: 200
Mid-Point Height: 100

SEAT BELT ANCHORAGES:

Place any adjustable seat belt anchorages at the vehicle manufacturer's nominal design position for a 50th percentile adult male occupant.

Design Anchorage Position: Fixed
Actual Anchorage Position: Fixed

TEST REPORT

MGA REPORT NO.: C07I7-009.1A

TEST (S) PERFORMED ON: November 21 - 22, 2006

TEST DESCRIPTION: FMVSS 208 - Suppression

ITEM DESCRIPTION: One (1) Chevy Trail Blazer Manual Seat w/Factory Trim

PROCEDURE NUMBER: MGATP208 – 12SUP_DS14.doc
Last revision date: 09/15/03

TEST REFERENCE NUMBER (S): SU6578 – SU6595

TEST LABORATORY: MGA Research Corporation
446 Executive Drive
Troy, Michigan 48083

SUBMITTED TO: Kirk Scott
Vice President, OEM Sales
Katzkin Leather, Inc.
6868 Acco Street
Montebello, CA 90640

Helen Kaleto
Project Leader

Test Personnel:
Louis S. Campbell
Tony Frontera

* The results presented in this report relate only to the specified test items.

** This report shall not be reproduced except in full, without the written approval of the laboratory.

Objective

This report contains results for FMVSS 208 – Suppression testing requested by Katzkin Leather, Inc. The test samples provided were tested to the requirements stated in FMVSS 208 (49CFR 572, Subpart N S20 dated 01/14/03). A testing matrix was constructed based upon the requirements and needs of Katzkin on one (1) vehicle with one (1) seat (Chevy Trail Blazer). No statement of compliancy will be made in this report.

Purpose

This standard specifies requirements for airbag suppression determination in the right front outboard seating position to eliminate the inflation of the passenger-side airbag when there is no occupant, an unrestrained child, or a child restraint system in the event of a collision.

FMVSS 208 Requirements

The National Highway Traffic Safety Administration (NHTSA) Test Procedure FMVSS 208-TP-12 specified the requirements of this test series.

Compliance shall be determined by the following:

- (a) Place the Child Restraint System (CRS) at the designated seating position.
- (b) Tighten the seat belt load to $130N \pm 3N$ for child seats.
- (c) Tighten the seat belt load to $9N - 18N$ for booster seats.
- (d) Shut all doors and turn the vehicle ignition to the on position.
- (e) Verify that the airbag suppression light is off.

Additional Customer-Specified Requirements

Per request, one (1) photograph was taken (passenger side) of each individual car seat and dummy position.

Equipment

MGA Research Corporation's FMVSS 208 Child Seats were used for this testing. For the complete test series, equipment included 10 child seats, a 50 lbs load cell, and the following dummies: Newborn Infant, CRABI 12 month-old, Hybrid III 3 year-old, Hybrid III 6 year-old, and Hybrid III 5th% Female.

Procedure/Method

Each vehicle was tested in accordance with FMVSS 208-12 test procedure Data Sheets 14-21 & 29. For each test scenario, the vehicle ignition was cycled and the suppression was verified.

Test Results

1 car bed, 3 rear facing, 4 convertible, and 2 booster Child Restraint Systems (CRS) were used to evaluate each seat. All tests requiring the Dummies were completed. All tests were conducted with respect to the standard. The Chevy Trail Blazer appeared to meet the requirements of FMVSS 208 Suppression. All data traceable to the National Institute of Standards and Technology (NIST).

mga research corporation

Date: 11/21/2006
Customer: Katzkin Leather
MGA Job Number: C0717-009.1A

VEHICLE INFORMATION:

Year: 2007
Make: Chevy
Model: Trail Blazer
Body Style: 4 Door SUV Factory Trim
VIN Number: 1GNDT13S172108211

DESCRIPTION OF TEST PROCEDURE:

This test procedure is used to conduct airbag suppression determination testing for FMVSS 208 – Occupant Crash Protection procedures. This procedure is based upon Data Sheet(s) 14 of the NHTSA Test Procedure (TP208-12).

Test Personnel: TF

PASSENGER DESIGNATED SEATING POSITIONS:

Using any part of any control, other than the parts just used for fore-aft positioning, determine the range of angles of the seat cushion reference line and set the seat cushion reference line at the mid-angle.

Maximum Angle: N/A
Minimum Angle: N/A
Mid Angle: N/A

Visually mark for future reference the seat back angle, if adjustable, at the manufacturer's nominal design riding position for a 50th percentile adult male in the manner specified by the manufacturer.

Design Seat Back Angle: N/A
Actual Seat Back Angle: 2.4 @ Headrest

BUCKET SEATS:

Locate and mark for future reference the longitudinal centerline of the seat cushion. The longitudinal centerline of a bucket seat cushion is determined at the widest part of the seat cushion. Measure perpendicular to the longitudinal centerline of the vehicle.

Width Of Seat Cushion: 554
1/2 Width Of Seat Cushion: 277

BENCH SEATS:

Locate and mark for future reference the longitudinal centerline of the passenger seat cushion. The longitudinal centerline is the same distance from the longitudinal centerline of the vehicle as the center of the steering wheel.

Distance from the centerline of vehicle to center of steering wheel: N/A
Distance From The Centerline Of Vehicle To Center Of Passenger Seat: N/A

HEAD RESTRAINTS:

Measure the vertical distance from the top most point of the head restraint to the bottom most point. Locate and mark a horizontal plane through the midpoint of this distance.

Height Of Head Restraint: 192
Mid-Point Height: 96

SEAT BELT ANCHORAGES:

Place any adjustable seat belt anchorages at the vehicle manufacturer's nominal design position for a 50th percentile adult male occupant.

Design Anchorage Position: Fixed
Actual Anchorage Position: Fixed

TEST REPORT

MGA REPORT NO.: C07I7-009.1B

TEST (S) PERFORMED ON: November 22, 2006

TEST DESCRIPTION: FMVSS 208 - Suppression

ITEM DESCRIPTION: One (1) Chevy Trail Blazer Manual Seat w/Katzkin Trim

PROCEDURE NUMBER: MGATP208 – 12SUP_DS14.doc
Last revision date: 09/15/03

TEST REFERENCE NUMBER (S): SU6596 – SU6613

TEST LABORATORY: MGA Research Corporation
446 Executive Drive
Troy, Michigan 48083

SUBMITTED TO: Kirk Scott
Vice President, OEM Sales
Katzkin Leather, Inc.
6868 Acco Street
Montebello, CA 90640

Helen Kaleto
Project Leader

Test Personnel:
Louis S. Campbell
Tony Frontera

* The results presented in this report relate only to the specified test items.

** This report shall not be reproduced except in full, without the written approval of the laboratory.

Objective

This report contains results for FMVSS 208 – Suppression testing requested by Katzkin Leather, Inc. The test samples provided were tested to the requirements stated in FMVSS 208 (49CFR 572, Subpart N S20 dated 01/14/03). A testing matrix was constructed based upon the requirements and needs of Katzkin on one (1) vehicle with one (1) seat (Chevy Trail Blazer) with Katzkin Leather trim. No statement of compliance will be made in this report.

Purpose

This standard specifies requirements for airbag suppression determination in the right front outboard seating position to eliminate the inflation of the passenger-side airbag when there is no occupant, an unrestrained child, or a child restraint system in the event of a collision.

FMVSS 208 Requirements

The National Highway Traffic Safety Administration (NHTSA) Test Procedure FMVSS 208-TP-12 specified the requirements of this test series.

Compliance shall be determined by the following:

- (a) Place the Child Restraint System (CRS) at the designated seating position.
- (b) Tighten the seat belt load to $130N \pm 3N$ for child seats.
- (c) Tighten the seat belt load to $9N - 18N$ for booster seats.
- (d) Shut all doors and turn the vehicle ignition to the on position.
- (e) Verify that the airbag suppression light is off.

Additional Customer-Specified Requirements

Per request, one (1) photograph was taken (passenger side) of each individual car seat and dummy position.

Equipment

MGA Research Corporation's FMVSS 208 Child Seats were used for this testing. For the complete test series, equipment included 10 child seats, a 50 lbs load cell, and the following dummies: Newborn Infant, CRABI 12 month-old, Hybrid III 3 year-old, Hybrid III 6 year-old, and Hybrid III 5th% Female.

Procedure/Method

Each vehicle was tested in accordance with FMVSS 208-12 test procedure Data Sheets 14-21 & 29. For each test scenario, the vehicle ignition was cycled and the suppression was verified.

Test Results

1 car bed, 3 rear facing, 4 convertible, and 2 booster Child Restraint Systems (CRS) were used to evaluate each seat. All tests requiring the Dummies were completed. All tests were conducted with respect to the standard. The Chevy Trail Blazer with Katzkin Leather trim appeared to meet the requirements of FMVSS 208 Suppression. All data traceable to the National Institute of Standards and Technology (NIST).

mga research corporation

Date: 11/21/2006
Customer: Katzkin Leather
MGA Job Number: C0717-009.1B

VEHICLE INFORMATION:

Year: 2007
Make: Chevy
Model: Trail Blazer
Body Style: 4 Door SUV Katzkin Trim
VIN Number: 1GNDT13S172108211

DESCRIPTION OF TEST PROCEDURE:

This test procedure is used to conduct airbag suppression determination testing for FMVSS 208 – Occupant Crash Protection procedures. This procedure is based upon Data Sheet(s) 14 of the NHTSA Test Procedure (TP208-12).

Test Personnel: TF

PASSENGER DESIGNATED SEATING POSITIONS:

Using any part of any control, other than the parts just used for fore-aft positioning, determine the range of angles of the seat cushion reference line and set the seat cushion reference line at the mid-angle.

Maximum Angle:
Minimum Angle:
Mid Angle:

Visually mark for future reference the seat back angle, if adjustable, at the manufacturer's nominal design riding position for a 50th percentile adult male in the manner specified by the manufacturer.

Design Seat Back Angle:
Actual Seat Back Angle: 2.4 @ Headrest

BUCKET SEATS:

Locate and mark for future reference the longitudinal centerline of the seat cushion. The longitudinal centerline of a bucket seat cushion is determined at the widest part of the seat cushion. Measure perpendicular to the longitudinal centerline of the vehicle.

Width Of Seat Cushion: 554
1/2 Width Of Seat Cushion: 277

BENCH SEATS:

Locate and mark for future reference the longitudinal centerline of the passenger seat cushion. The longitudinal centerline is the same distance from the longitudinal centerline of the vehicle as the center of the steering wheel.

Distance from the centerline of vehicle to center of steering wheel: N/A
Distance From The Centerline Of Vehicle To Center Of Passenger Seat: N/A

HEAD RESTRAINTS:

Measure the vertical distance from the top most point of the head restraint to the bottom most point. Locate and mark a horizontal plane through the midpoint of this distance.

Height Of Head Restraint: 192
Mid-Point Height: 96

SEAT BELT ANCHORAGES:

Place any adjustable seat belt anchorages at the vehicle manufacturer's nominal design position for a 50th percentile adult male occupant.

Design Anchorage Position: Fixed
Actual Anchorage Position: Fixed
